

## Design and Build Capabilities

We have been serving the automotive industry since 1973. We are a full-service company specializing in all types of gaging, fixtures, and test equipment

We can design and build custom testing equipment ranging from small hand-held gages to large computer controlled test machines.

Our thirty years of experience in the industry assures our customers of the most efficient design possible, and our highly-trained staff manages each project from the concept stage right through the final build and certification process.
